SUMMARY

A passionate and proactive Software Developer completing final studies at IEN Institute. Actively seeking a full-time role with a focus on web and hybrid application development. Experienced in collaborative, Agile/SCRUM environments, utilizing technologies like React, TypeScript, and SQL Server. A detail-oriented professional who values clean code, teamwork, and open communication to drive team success.

EXPERIENCE

Subsecretaria de Contenidos Audiovisuales *September 2024 - November 2024*
Intern - Educational Robotics and Programming Corrientes, Argentina
• Applied programming logic for robotics and automation in practical environments using Arduino IDE.

• Collaborated within a multidisciplinary team to develop technology-focused educational content, contributing to both technical and creative tasks.

• Enhanced teamwork and communication skills by adapting to a dynamic and technologically diverse work environment.

PROJECTS

Developer Portfolio SPA *React, TypeScript, Tailwind CSS, Context API*
Architected a fully responsive Single Page Application https://github.com/nanonoir/developer-portfolio
• Architected a fully responsive Single Page Application (SPA) using React and TypeScript to serve as a professional digital presence.

• Implemented a global state management system with React's Context API to control multi-language support (i18n) and a dynamic light/dark theme.

• Ensured code maintainability by designing a component-based architecture and styling with Tailwind CSS.

GymPoint - Full-Stack Fitness Application *React Native, Node.js, Express, MySQL, JWT*
Cross-Platform Mobile Application
• Developed a full-stack, cross-platform mobile application using React Native and a Node.js backend to connect gym-goers with fitness centers.

• Designed a relational MySQL database and secured RESTful API endpoints with JSON Web Tokens (JWT) for robust user authentication and data management.

• Integrated a gamification system featuring tokens and attendance streaks to significantly boost user engagement and motivation.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL
Frameworks & Libraries: React, React Native, Node.js, Express
Developer Tools: Git, Docker, Vite, Jira, Trello, Postman
Databases: PostgreSQL, MySQL
