Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer specialized in React, React Native, and Node.js, with experience building end-to-end web and mobile applications. Experienced in developing projects using TypeScript, MySQL, and Docker, integrating REST APIs and managing version control with Git in agile environments.

EDUCATION

- I.E.N. (Instituto Educativo Económico Nacional)** 2023 - 2025 (Completed)
Software Development Technician Resistencia, Chaco

EXPERIENCE

- Subsecretaría de Contenidos Audiovisuales** August 2024 - November 2024
Intern in Robotics, Chatbots, and Artificial Intelligence Corrientes, Argentina
 - Programmed microcontrollers in Arduino IDE, implementing event-driven conditional logic for interaction with physical sensors.
 - Integrated sensors and actuators into functional prototypes, developing control routines and validating system behavior.
 - Performed hardware/software testing and debugging in collaboration with a multidisciplinary technical team.

PROJECTS

GymPoint: Mobile Fitness Application for Routine Management and Workout Tracking

React Native, Node.js, MySQL, Sequelize, and Docker

- Designed and developed a hybrid mobile application with a client-server architecture using React Native and Node.js.
- Implemented an authentication system with JWT (access and refresh tokens) and role-based authorization (free, premium, and admin).
- Built a REST API with 27 endpoints using Node.js and Sequelize to manage users, attendance with GPS validation, routines, rewards, and physical progress persisted in MySQL.
- Implemented backend and database deployment using Docker on a VPS, generating an Android APK connected to the deployed environment.

Film-Match: Web Application for Discovering Movies Through Personalized Recommendations

React, TypeScript, Node.js, MySQL, and Prisma

- Developed a full-stack web application for movie search and discovery based on user preferences.
- Implemented a REST API with more than 10 endpoints using Node.js and MySQL for basic authentication, profile management, and reviews.
- Integrated a recommendation chatbot using the Gemini API, handling asynchronous requests and dynamic response processing in the frontend.

SKILLS

- Programming Languages:** JavaScript, TypeScript
- Frontend:** React, React Native, HTML5, CSS3, TailwindCSS
- Backend and Databases:** Node.js, Express, MySQL, PostgreSQL, Sequelize, Prisma
- DevOps and Tools:** Docker, Git, GitHub, Postman, VPS, Jira, Trello
- Languages:** Spanish (Native), English (B2 Level - Intermediate)
